# Roll Play

Part workout, part puppet show extravaganza, **ROLL PLAY** gets kids to jump up, do a little jig, swim like a whale, laugh like a hyena and explode like a volcano. Each story introduces the children to compelling characters, takes a journey with a strong climax and includes lots of physical movement.

The beautiful black light puppetry of the award-winning theatre troupe FAMOUS PEOPLE PLAYERS makes ROLL PLAY an adventure from the bottom of the sea to the surface of the moon. As the puppets begin to tell a story over their signature black backgrounds, the children mimic and become part of the same story. As

we cut between the two groups we see the kids copying, responding to and creating their own version of the puppets' movement.

Each episode features an original score with big, full sounds that reflect and enhance the characters and stories on screen.

ROLL PLAY allows for various levels of preschool agility and comprehension by emphasizing imaginative exercises. It will entice kids to move and will arm them with the lifelong knowledge that exercising is not a dirty word but an opportunity to play, explore and imagine.
